Polarized Meningioma of the Skull Base - Rarely Associated with Cerebral Edema and Lobulation - Case Report of a Rare Central Nervous System Lesion. Polarized meningioma is a tumor characterized by meningothelial cells with variable eosinophilic cytoplasm and elongated spindle or stellate cell shapes arranged in a radially polarized fashion, and it was first described in 1985. This tumor can be found at almost any location in the central nervous system and is usually asymptomatic. It is a rare tumor, with few cases having been reported in the literature. A 68-year-old female patient with chronic headaches and gait disturbance was diagnosed with a central mass at the skull base. Imaging study identified a unilateral, expansive, solid mass in the right frontal lobe and adjacent dura, and the patient underwent surgical resection. On histological examination, the tumor showed a pattern of meningothelial cells arranged radially with peripheral palisading and rosette patterns, consistent with a polarized meningioma. The differential diagnosis is mainly limited to neoplastic and nonneoplastic processes involving the meninges. Knowledge of the various features of this entity is key to making an accurate diagnosis. Nothing like a debate to spice up an otherwise dull national election. It has already started. Though the current parliamentary session of the federal parliament, with its bottom-line number of 226 members, is just 12 days old, political bickering has already begun. As expected, former federal Environment and Natural Resources minister Tony Burke and former federal Justice minister Michael Keenan will meet to argue their case to retain the special status of industrial relations agreement - the so-called "Cost Recovery" - that allows unions to charge members fees. Before the 2012 election, Tony Abbott promised the Gillard government that he would not allow such a special deal to be made. He said during the campaign that the special exemption was a "ticking time bomb." However, the Abbott government, ever keen to give the impression that it is a different kind of government to what they inherited, has since indicated they are prepared to rubberstamp the deal as long as Labor does. In a long-awaited policy statement released to Fairfax Media on Thursday, Attorney-General Nicola Roxon pointed out that changes to the special deal were recommended by a review of industrial relations in Australia in 2011 but had not yet

winter of 2004, a strange event drew a small group of people together for a very special reason: to cross the summit of Everest for the first time. Four years later, the winter expedition of the year 2001 is completed and the climbers, in groups of two, are descending the North Col of Everest. The group of four had hoped to penetrate the North Col via the Hillary Step, but changed to the less technical South Summit, where they were trapped by high winds and big snow fields. To escape, they would have to survive a nearly airless night in a barren, exposed region surrounded by brutal wind, snow and darkness. In this film, eight friends played by acclaimed actors assemble, and enrage: Montaigne Energy billionaire Thomas Daglish (Ed Harris), a seemingly demure man who ruthlessly exploits the world's resources, his right-hand man Wally Whipple (Bill Pullman), an eager killer, his son Alex (Chris Evans), a podiatrist diagnosed with a debilitating blood disorder, a French guide, a German guide, a Finnish guide, a young climber fascinated by Everest, and a woman who has barely spoken up until now. For these people, the real issue is life or death. This film is a work of fiction, as are most documentaries of this type, which is no less valid for that. Montaña de Fuego has received a number of awards in the festival circuit, including the Golden Lion and a Special Jury Prize at the Venice Film Festival. See the trailer.

Q: Is there a way to run web-applications as non-root user? I have an application that requires running as a daemon (it has to be running in the background after reboot). Since I want to run the application as a non-root user (i.e. as the same user that runs my GUI), would it be possible to use a sudoers rule to give a user (not root) permission to run the daemon? Thank you

A: You can use sudoers for that but don't put your head into the it. sudo allows users (a group) to run commands as another user (member of the group)
