Very fun puzzle game that gets increasingly challenging as you advance through the levels. This game is a perfect fit for VR as you have to look around at different angles to see everything, I can't imagine playing it without VR. Only complaint is that it's a little short, I beat all levels and collected all eggs in 2 hours. But it is one of the most polished games for VR right now and for \$10 I think its worth it if you like puzzle games.. definitely a family friendly game. very stylized art, and challenging puzzles.. If you are a fan of puzzle games you owe it to yourself to pick this up. Intuitive controls and a polished experience makes this game a must have.. Very cute puzzle game that benefits from VR. Penguins need to get to their spaceship, and always make

---

right turns. You touch the map and alter the puzzle to help them.. Has Penguins. Need I really say more here? Fun puzzle game, cute graphics, has penguins. Worth the money. Did I mention this game has penguins? Yeah? Well it's awesome.. This game is awesome! You can tell it was made for the Vive. Easily one of the prettiest games I have right now. The gameplay is a lot of fun, and there seems to be a good number of levels. It feels very polished, not buggy at all unlike a lot of other VR games out right now. I got this game for 30% off (\$7), definitely worth the price! Even seems like a bargain for \$10.. Review updated after ending the game (around 2hrs for 40 levels). Very polished experience, with very nice music too. Being a puzzle game, the overall level of difficulty is not very high (depending on your skills too) but it's not as easy as Water Bears that don't offer any challenge for 95% of levels (and the remaining 5% is extremely difficult!). The game is good if you've the space, so you can walk around your level, but can be played also with a small chaperone. Suggested if you love puzzles, or simply want a polished vr game with a real start and a real ending.
